

Same-snapshot finder comparison; $N_p = 1024^3$, $L = 512 h^{-1} \text{Mpc}$

Finder revisions: a8c7715 to 8107a644e7a7

All published populations. Open low-count bins: $0 < N < 20$; ratios require both $N \geq 20$. Bars: $\sqrt{N}$ only.

Grey below $\log_{10} M = 12.5$: $z = 0$ literature reference; no convergence claim for the revised finder.
